Highlights

Unique OneBlade Technology

The Philips OneBlade is a revolutionary new electric grooming technology designed for men who wear facial styles and grow beards. OneBlade is designed to trim, edge and shave any length of hair. The unique OneBlade shaving technology integrates a fast moving cutter (200 x per second) with a dual protection system – giving you an efficient, comfortable shave on longer hair. OneBlade does not shave too close – so your skin stays comfortable.

Trim it down

Trim your beard to a perfect, even length with the included adjustable precision comb. Dial up one of the 14 locked length settings to get everything from a 5 o'clock shadow or a tight trim to longer beard styles.

Edge it up

Get a perfect edge on your style with the dual-sided blade. You can shave in either direction to get great visibility and see every

hair that you're cutting. It stays comfortable even in sensitive areas, so it's fast and easy to line up your style in seconds.

Shave it off

OneBlade does not cut too close, so your skin stays comfortable. Go against the grain and shave off hair of any length in comfort.

Contour following

OneBlade follows the contours of your face, allowing you to effectively and comfortably trim and shave all areas of your face.

Dual-sided blade

Style your edges and create clean lines by moving the blade in any direction.

14-length precision comb

The versatile precision trimming comb offers length settings from 0.4 mm to 10 mm, giving you an even trim at exactly the length you want.

Durable OneBlade

The blades are designed for lasting performance. For optimal performance, you will only need to replace the blade every 4 months*. Replacement is easy and hassle-free.

Wet and dry

OneBlade is water resistant, so it is easy to clean: just rinse it under the tap. You can also shave with or without foam - whichever you prefer.
