- 64-bit software is required to enjoy the advantages of 64-bit processing.
- Specifications vary depending on model.
- A 64-bit operating system is required to enjoy the ultimate performance of 4 GB or higher memory. 32-bit operating systems are limited to using 3 GB of the available memory.
- Shared system memory may be allocated to support integrated graphics, depending on system memory size and other factors. Actual system memory available to the operating system will be reduced by the amount of any memory utilized by the graphics solution and resources required by the operating environment.
- 1 GB is 1 billion bytes, 1 TB is 1000 GB. Actual formatted capacity is less and may vary depending on preloaded materials and operating environment.
- Actual throughput may vary depending on network conditions and environmental factors such as network traffic or overhead, building construction and access point settings.
- Bundled software may vary depending on hardware configuration, OS and regional availability.
- Trial periods vary depending on the geographic region and specifications: 365-day trial for China, Taiwan, Hong Kong and Singapore (Simplified Chinese and Traditional Chinese OS models); 60-day trial for other regions.

In a continuing effort to improve the quality of our products, information in this document is subject to change without notice. Images shown are only representations of some of the configurations available for this model. Availability may vary depending on region.
