

AXIS P1353/-E and P1354/-E Network Cameras

Superb image quality for video surveillance in any environment.

- > Superb video quality including HDTV
- > Lightfinder technology
- > Multiple H.264 video streams
- > Digital PTZ
- > Edge storage
- > Outdoor-ready models

AXIS P1353/-E and AXIS P1354/-E are light sensitive indoor and outdoor-ready fixed cameras that deliver superb image quality with H.264 compression and are ideal for high-performance surveillance in any indoor or outdoor environment.

AXIS P1353/-E are SVGA cameras and AXIS P1354/-E provide HDTV 720p or 1 megapixel resolution at full frame rate. Models are available in both indoor and outdoor-ready versions.

The cameras provide wide dynamic range – dynamic contrast, and day and night functionality for superb image quality in daylight and dark conditions.

The cameras support Axis' Lightfinder technology, which makes them extremely sensitive to low light.

All AXIS P13 cameras deliver multiple H.264 and Motion JPEG video streams.

All models have a remote back focus function that enables the focus to be fine-tuned from a computer. All models also offer digital pan/tilt/zoom. The cameras are equipped with a serial port for communication with auxiliary equipment such as pan/tilt head in order to remotely change the camera direction.

AXIS P13 cameras support Power over Ethernet (PoE) for easy installation. The outdoor-ready models operate using PoE and High PoE in temperatures from -40 °C to 50 °C (-40 °F to 122 °F).

High-performance indoor/outdoor cameras

AXIS P13 Series offers fixed network cameras suitable for a range of video surveillance applications, including government and industrial buildings, retail environments, airports, railway stations and schools.

Easy installation with focus assistant, remote focus and pixel counter

Setting the focus on all AXIS P13 cameras is made easy with the focus assistant, which indicates with a flashing green LED when an image is in focus after manually adjusting the lens. Additionally, they offer remote back focus, which allows the focus to be fine-tuned from a computer. The pixel counter further helps the installer verify that the pixel resolution of an object fulfills regulatory or customer requirements, for example, for facial identification.

Digital PTZ

All camera models support digital pan/tilt/zoom, which allows a selected area of interest to be cropped from the full view for viewing or recording, thereby minimizing the bit rate and storage needs.

Lightfinder technology

AXIS P1353/-E and AXIS P1354/-E Network Cameras incorporate Axis' unique Lightfinder technology. The outstanding light sensitivity, with maintained colors even in very poor lighting conditions, is obtained by a combination of Axis' expertise in image processing, system-on-chip development and selection of the best optical components. For more on Lightfinder technology, go to: www.axis.com/corporate/corp/tech_papers.htm

AXIS Camera Application Platform

The cameras include support for AXIS Camera Application Platform, AXIS Video Hosting System and ONVIF for easy camera system integration and for application developers to provide the camera with intelligent capabilities.

Outdoor-ready models

AXIS P13-E Network Cameras save installation time and costs since they are ready out of the box for mounting outdoors. The IP66-rated cameras have protection against dust, rain, snow and sunlight, and can operate in temperatures as low as -40 °C (-40 °F). The cameras are powered by Power over Ethernet,

which makes installation easy since there is no need for a separate power cable. An integrated dehumidifying membrane eliminates any humidity caught in the camera enclosure during installation. The cameras enable easy mounting of an infrared illuminator under the enclosure. They come with a wall mount bracket, sunshield and cable glands.
