INCLUDED

## Brighten Up Your Game

Your gaming chair needs to do two things: be comfortable and be stylish. Because, let's be honest; a gaming chair is the most prominent part of any game room. The Trust GXT 716 Rizza does both gloriously. It's extremely comfortable due to the neck and lumbar pillows, while the fully integrated RGB LED-illuminated edges provide a sense of style that will make the Rizza the centre of your game room.

## 350+ RGB Modes

The Trust Rizza can be truly personalised. The colourful RGB tubes can be set to 12 different fixed colours, the brightness can be adjusted and you can choose out of over 350 different RGB modes with the remote control. The lights are powered by the accompanied powerbank, which means you don't need to connect a cable to your PC. Your throne, your identity.

## Gaming Comfortably For Hours On End

Style is one thing, but it's important to stay comfortable as well. This high-end gaming chair is fully adjustable to your liking. The seat itself is adjustable in height with the class 4 gas lift, while the tiltable backrest will provide you with more than enough support to keep you gaming comfortably. Place the adjustable neck and lumbar pillows where you want and enjoy your game without worrying about back pain.

## Sturdy

Thanks to the solid base frame, the Trust GXT 716 is extremely sturdy. The large wheels provide plenty of movability, while the full 360° rotatable seating allows you to quickly turn around when needed. The Trust Rizza makes any gamer - up to 2m in length and with a weight of up to 150kg - play comfortably.

## Convenience

The remote control allows you to choose the settings you want. Whenever you switch the Rizza off, this chair remembers what RGB settings you like the next time you turn it back on. And after adjusting the Rizza to your liking, just place the remote in the integrated pocket that also holds the powerbank. Everything within reach; all that awaits is your next victory.
