Highlights

Designed for Xbox

Unleash your console gaming. We partnered with the Xbox team to develop this Designed for Xbox display that is validated to deliver the optimal Xbox Series X visual performance the moment that you plug it in.

4K/120 Hz Console gaming

Game with ultra-clear 4K resolution at a smooth 120 Hz refresh rate when you connect your Xbox Series X and other next-gen consoles via one of multiple HDMI 2.1 connections. A faster refresh rate ensures less skipped frames, showing enemy movement in an ultra-clear, smooth motion to easily target them.

4K/144 Hz PC gaming

PC gamers who demand a true 4K gaming experience with the fastest refresh rate of

144 Hz can now enjoy even smoother performance with the included connections.

Low Latency Gaming

Unlike standard TVs, Philips Momentum gaming displays are purpose-built with low lag and lightning-fast pixel response as a priority and supports fast-paced, reaction time-sensitive games. The display also provides variable refresh rate (VRR) support for Xbox Series X to achieve a seamlessly smooth motion.

VESA DisplayHDR 1000

VESA-certified DisplayHDR 1000 delivers a dramatically different visual experience vs. other 'HDR compatible' screens. Extreme deep blacks and bright whites contrast with brilliant colours to bring out details that you've never experienced before. Gamers can spot enemies hiding in the dark corners and shadows easily and movie viewers can enjoy a more compelling and lifelike show. This Philips Momentum comes with several HDR modes, each optimised for your usage scenarios: HDR Game, HDR Movie and HDR Photo.

Bowers & Wilkins speakers

A new standard for gaming audio: covered by an acoustically transparent wool-blend Kvadrat material, the integrated speaker system by legendary speaker experts Bowers & Wilkins delivers an epic sound experience. With an integrated woofer, high-quality midrange drivers and tweeters, you can feel the action around you. This Philips Momentum display also offers True Sound audio modes specially tuned by Bowers & Wilkins: simply select an audio mode to optimise your gaming, viewing or listening experience.

Ambiglow

The innovative Ambiglow technology enhances the content on the screen by creating a halo of light from the monitor. Its fast processor analyses the incoming image content, continuously adapts the colour and brightness of the emitted light to match the image. Especially suited for watching movies, sports or playing games, Philips Ambiglow offers you a unique and immersive viewing experience.
