

Data Sheet

# Acer FHD Webcam

## A Full HD Webcam for Crystal Clear Video Calling

This FHD webcam produces clear and sharp visuals at up to 30 FPS. The wide, 80° lens angle lets people on the other end see everyone on your side in the conference call.

### Covering All Angles

As well as the mounting clip which makes it easy to attach the webcam to your notebook or monitor there is also a screw mount attachment point allowing you to connect to a desk tripod.

The privacy shutter can be flipped closed to cover the lens - protecting your privacy and shielding the lens from dust and scratches.

### Built-in Omnidirectional Microphone with noise reduction

The omnidirectional microphone enhances the sound quality of all your online meetings: Google Meet, Zoom, conferences, streaming, and more.
