#### 1ms Visual Response Boost™

1ms Visual Response Boost™ (VRB), works by either quickly turning off the backlight or inserting a blank, black image between frames aka "blinking". This results in less noticeable blur in fast moving images because the liquid crystals don't have to double up on frames as they rise and fall.

#### In-Plane Switching technology

Advanced liquid crystal formula for advanced IPS\* technology for premium color performance, which has no color difference at any viewing angle.
