- Para adicionar outro Multy, clique no ícone **Menu**. Vá para o ecrã My Multy (Meu Multy), e clique em Add Multy (Adicionar Multv).
- 8 Siga as instruções no ecrã para configurar o segundo Multy.

Optional Configure with Multy App

Download the Multy app to install and manage your Multy WiFi system.

> Zyxel Multy 🔍 MULTY MULTY Multv

Multy app currently supports English, German, Spanish, French, Italian, Portuguese, and Chinese.

Troubleshooting

The Primary Multy's LED is steady red.

- This means the primary Multy failed to connect to the Internet. Make sure DHCP is enabled in your modem/router. If you have a PPPoE connection or a static IP address assigned by your Internet Service Provider, make sure you entered this information correctly
- If the problem continues, reset Multy back to its factory defaults.
- If this does not work, contact your local support team.

The Second Multy's LED is steady red.

- This means the second Multy is too far from the primary Multy. Move your second Multy in extender mode closer to the primary Multy.
- If the problem continues, reset this Multy back to its factory defaults.
- If this does not work, contact your local support team.

Reset Multy back to factory defaults.

- Press the reset button for more than 5 seconds.
- Release the reset button when Multy begins blinking red. Multy reloads factory-default settings, and begins to reboot. This may take up to 2 minutes.

Optional Protect with AiShield App

Download AiShield app to identify and prevent threats in your network. Create profiles to customize Internet access for individual devices in your network.
