Full HD LED monitor

The 1920 x 1080 resolution of this LED monitor delivers excellent detail, making it perfect for advanced HD multimedia and productivity applications. LED monitors also consume less power and last longer than those with CCFL lamps. In addition, this monitor is mercury-free, making it safer for you and the environment.

Acer EcoDisplay

Acer monitors using white LED backlight technology minimize environmental impact while providing superior performance and durability. These monitors do not contain the toxic substance mercury, making them safer for the environment. They also consume less power and last longer than monitors with CCFL lamps, for good savings. As part of our commitment to sustainable operations and corporate social responsibility, Acer uses product-design principles and material-management methods that reduce the impact of our operations on the environment.

BlueLightShield™

BlueLightShield

Acer BlueLightShield reduces the exposure ratio of blue light, which can potentially cause long-term eye damage, by adjusting color hue and brightness.

100Hz Refresh Rate

The 100Hz refresh rate speeds up the frames per second, lowering input lag, delivering ultra-smooth 2D motion scenes, and providing a strain-free viewing experience.
