Acer Bluelight shield allows users to lower levels of blue light to lessen the negative effects of blue light exposure. There are three levels of filter in projector suitable for different scenario. Each level also contains dynamic mechanism that will optimize the blue light level based on content. Bluelight shield can reduces up to 30% blue light and protect your eyes.

### Up to 30,000 hours LED lifespan

LED lighting lets you enjoy outstanding color performance wide color gamut, creating vibrant visuals and delivering consistent color saturation. Its greater bulb durability provides up to 30,000 hours long lifespan. In addition, by eliminating the potential pollution from mercury lamp disposal.

### 120% Rec. 709 Wide color gamut

Using three separate Red, Green, Blue LED emitter panels, this projector achieves an extended 120% Rec. 709 wide color gamut and reproduces accurate color balance. The color gamut is 1.5X~2X wider than traditional lamp-based projector. It also provides higher contrast ratio – up to 2,000,000:1. Enjoy outstanding color performance with LED light source.
