Wireless Charging Pad

XC100

This slimline wireless charging pad brings style and convenience to any workspace, office, bedroom or living setting. Simply connect the XC100 pad to power at your preferred location and enjoy worry-free charging with no more power cords to check, plug and unplug all the time. This pad not only simplifies charging, but it's also designed to ensure the charging process is fast. Thanks to the built-in OTP, OTC and overcharge protection as well as

foreign object detection (e.g. coins, cards, metal surfaces and objects) XC100 also charges your smartphone safely. Removing your smartphone case is not needed as the pad also works seamlessly with most cases on the market. The classic design, available in black and white, does not consume space, is very light to carry in a bag and easily adds elegance to any setting.

► Wireless Qi Charging

Worry-free wireless charging: The XC100 wireless charging pad is compatible with all smartphones (iOS and Android) supporting the Qi charging standard. Simply charge your phone by placing it on the pad, it's as easy as that.

► Fast charging

Ready to go when you are: Designed to deliver fast-charging speed with 7.5 W of power to iPhone models and 10 W to Samsung phones, this charging base spares your time. Simply leave your phone on the pad while getting ready to go, while working or before sleep. *

► Ultra-slim compact design

Slimline and elegant: With its 8 mm ultra-slim base, clean and compact design, this wireless charging pad fits well with any workspace or living environment adding a touch of sophistication to your space. Its light and compact body also makes it perfect to tuck it in your bag and carry with you to the office or when traveling.

► Over-temperature and overcharge protection

Better safe than sorry: XC100 is equipped with all essential protection for your smartphone and to ensure safe durable use of the charging pad. Over-temperature protection (OTP) ensures the device operates within the maximum safe temperature preventing any related damage. The overcharging protection (OVP) is designed to protect the battery of your smartphone.

Specifications

Wireless charging standard: Qi
Input Working voltage (V): 5V/9V
Output power: 5W/7.5W/10W
Transport efficiency: 5V/1A $\geq 70\%$, 9V/1A $\geq 80\%$
Charging induction distance: 2-8 mm
Light status indicator
Overcurrent & Overvoltage protection
Over-temperature protection: over 60 °C
Foreign objects detection
Charging working frequency: 110KHz-205KHz
Input type: Micro USB
Input cable length: 80 cm

Package Contents

Wireless charging base, charging cable, Quick Start Guide

Compatibility

All Qi-enabled smartphones such as iPhone, Samsung, Google, LG, Nokia, Lenovo

Product Dimensions & Weight

Dimensions: 97×7.6 mm
Weight: 53 g

* For fast charging iPhone and Samsung smartphones, you need a QC adapter.
