## XC140

This essential wireless charger brings convenience to any workspace, office, bedroom or living setting. Simply connect the XC140 pad to power at your preferred location and enjoy worry-free charging with no more power cords to check, plug and unplug all the time. This pad not only simplifies charging, but it's also designed to ensure the charging process is fast. This charger features all built-in thermal, over-

voltage and short-circuit protection as well as foreign object detection (e.g. coins, cards, metal surfaces and objects) to ensure charging your smartphone safely. Removing your smartphone case is not needed as the pad also works seamlessly with most cases on the market. The simple design does not consume space, is very light to carry in a bag and also features a non-slip surface.

### ► Wireless Qi Charging

Worry-free wireless charging: The XC140 wireless charging pad is compatible with all smartphones (iOS and Android) supporting the Qi charging standard. Simply charge your phone by placing it on the pad, it's as easy as that.

### ► Fast charging

Ready to go when you are: Designed to deliver fast-charging speed with 7.5 W of power to iPhone models and 10 W to Samsung phones, this charging pad spares your time. Simply leave your phone on the pad while getting ready to go, while working or before sleep.

### ► Compact lightweight design

Light and portable: With its clean and compact design, this wireless charging pad fits well with any workspace or living environment adding more convenience to your space. Its light and portable body also makes it perfect to tuck in your bag and carry with you to the office or when traveling.

### ► Over-temperature and overcharge protection

Better safe than sorry: XC140 is equipped with all essential protection features for the safety of your smartphone, and to ensure safe durable use of the charging pad: including over-current, over-voltage, short-circuit and thermal protection. Foreign object detection further secures stable wireless charging by detecting metal objects around the wireless charger (e.g. cards, coins, cases' metal parts) and controlling the wireless power transfer.

## Specifications

Wireless charging standard: Qi  
USB input: 5V DC /2A, 9V DC/1.67A  
Output: 5W/7.5W/10W (max)  
Charging induction distance: ≤ 10 mm  
Charging working frequency: 110KHz-205KHz  
Foreign Object Detection protection  
Overcurrent & Overvoltage protection  
Short circuit protection  
Thermal protection  
Input type: USB A - USB C  
Input cable length: 80 cm  
USB Wall Charger: QuickCharge 3.0 or Fast Adaptive Charging (5V/2A, 9V/1.67A, 9V/2A)

## Package Contents

Wireless charging base, charging cable USB A - USB C, USB Wall Charger 3.0, Quick Start Guide

### Compatibility

All Qi-enabled smartphones such as iPhone, Samsung, Huawei, Google, LG, Nokia

### Product Dimensions & Weight

Dimensions: 100x12 mm  
Weight: 65 g
