WHY YOU SHOULD BUY THE LENOVO IDEAPAD GAMING 3 (16", 7)

Speed meets endurance with AMD Ryzen™ processors

Speed meets endurance when you play with a gaming laptop powered by AMD Ryzen™ processors. Seize the pure performance you need to win, without compromising battery life.

The ultimate play

GeForce RTX™ 30 Series GPUs deliver the ultimate performance for gamers and creators. They're powered by Ampere—NVIDIA's 2nd gen RTX architecture—with new RT Cores, Tensor Cores, and streaming multiprocessors for the most realistic ray-traced graphics and cutting-edge AI features.

See it all. So much more clearly

Sick of gaming on a low-refresh low-resolution screen? The IdeaPad Gaming 3 is here to answer your every need. With a WQHD+ (2560 x 1600) display delivering top quality in the category, your plays and streams won't be lacking a thing. Freaky-good framerate from the 165 Hz refresh display means more plays with more speed. Plus, a 16:10 aspect ratio with up to 500 nits brightness means this laptop is perfect for gaming and productivity. Throw in 4-sided narrow bezels for maximum screen coverage and you'll swear you're just seeing things.

The silent gaming machine

Quad Vent jet-inspired thermal technology from IdeaPad Gaming cools your machine drastically. 15% cooler performance across the board comes from 20% larger ventilation rate compared to last generation, as well as an increased fan airflow and some bonus cooling from keyboard air intake. Cool cats require cool machines, don't you think? Don't suffer loud fan noise on a laptop that's meant to fit into any environment sleekly and subtly.
