Plug the receiver into a computer USB port. Your mouse is now ready for use.

**Mac OS X Users:**

When plugging in the receiver, the Keyboard Assistant window may appear. Please close this window.

## Mouse features

1. Left and right buttons.
2. Scroll wheel  
Press the wheel down for middle button (function can vary by software application).
3. Battery LED  
Flashes red when battery power is low.
4. On/Off slider switch.
5. Battery door release.

## Help with setup: Mouse is not working

1. Is the mouse powered on?
2. Is the receiver securely plugged into a computer USB port?
3. If the receiver is plugged into a USB hub, try plugging it
4. Check the orientation of the batteries inside the mouse. To check battery power, turn the mouse OFF and then ON. If the battery indicator light glows red or does not glow at all, replace the batteries.
5. Try using the mouse on a different surface. Remove metallic objects between the mouse and the receiver.
6. Try moving the receiver to a USB port closer to the mouse.

The receiver with this mouse does not integrate the Logitech® Unifying technology. However, the mouse itself is Unifying-ready and can be used with any Logitech® Unifying receivers you may already have. Logitech® Unifying technology connects up to six compatible Logitech mice and keyboards to the same receiver, using only one USB port for multiple devices.
