# da Vinci Jr. 2.0 Mix

Recommended Retail Price: € 579

Target Audience: Schools, Hobbyists, Home-use and Beginners / Children.

## One nozzle, two colours

The da Vinci Jr. 2.0 Mix is our first printer that lets you print in gradient colour! Blend two PLA filaments of any colour using the new dual-feed with a single extruder module to create a print that gradually changes from one colour to another.

## Many exciting possibilities

The da Vinci Jr. 2.0 Mix lets you choose from two modes in XYZware. Multicolour Mode lets you print in two different block colours from different file sources, while Mixer Mode lets you split colour blocks in one print file according to the height of your print – each block contains single colour or a set of graduated colour blocks.

## Stay connected

- Print directly from your computer in your local area network.
- Use the XYZgallery App to print directly from Android and Apple devices.
- Built-in SD card for convenient printing.

## Eco-Friendly PLA Filament

All XYZprinting PLA filament spools are made of biodegradable plastic that is recyclable and environmentally-friendly! With its compact design, this 3D printer makes sure that nothing goes to waste.
